

CATALYTIC STOVES

Our DutchWest Catalytic Stove is available in three sizes to suit any heating need. Available in Small, Large and Extra-Large.

Save On Fuel Costs

DutchWest catalytic stoves use a convection-like system for longer, more even heating. This high efficiency method helps produce more heat from less wood, which in turn, helps reduce fuel costs to heat your home.

Clean-Burning Performance

Thanks to the help of the catalyst, smoke particulates are reduced to as little as 1.1 grams per hour. This ensures your family can enjoy a clean-burning stove that delivers all the heating power they need to keep warm.

Large, Clear Viewing Area

The large glass door provides an unobstructed view of the beautiful flames. The overfire airwash ensures the glass stays clean so friends and family can enjoy the view for years to come.

Stovetop Cooking

The unique, raised griddle provides the perfect spot to warm bread or cook other foods while enjoying the warmth and beauty of your cast iron stove.

Additional Features:

- Traditional Federal styling
- Solid, durable cast iron construction
- Decorative polished nickel accents
- Ash pan for convenient ash disposal
- "Fall Away" handle is cool to the touch, and easily stows away at the side of the stove
- Ash lip adds to the stove's cleanliness by catching ashes when using the front-loading door
- Top and rear reversible flue collar – allows you to choose between the top and rear venting configurations
- Side-loading design provides easy access when loading the stove
- Bottom heat shield to accommodate standard hearth pad

Optional Accessories:

- Dual speed convection fan
- Rear and bottom heat shield
- Fan thermostat
- Fan rheostat
